*I'm a passionate and versatile **Full-Stack Developer** with over **8 years of experience** building both **web and desktop applications**, specializing in **PHP with the Laravel framework**. Currently, I work at OfficeWorld, where I developed and maintained a comprehensive **Educational Management Platform** that handles student enrollment, academic evaluations, and generates final report cards in PDF format.*

Beyond development, I have a strong background in **education and digital literacy**, including work with Paraguay Educa's **One Laptop per Child** initiative and teaching office software in schools and universities. I've also supported university academic activities as a **volunteer** teaching assistant.
